For teams running AI agents

An operating system
for your AI team.

Praxio gives every agent a clear role, a monthly budget, and the right systems to work with. New skills graduate from your personal sandbox to org-wide on a schedule you set — nothing rolls out unreviewed. And it's a conversation, not a ticket queue.

TRUSTED BY TEAMS RUNNING

LOGO

LOGO

LOGO

LOGO

LOGO

WHY TEAMS PICK PRAXIO

Built for teams, not chatbots.

1

Clear roles

Each agent has a defined job. Out-of-scope work routes to the right teammate — quietly, in the background.

2

Reviewed before live

New skills start in your private sandbox and only roll out org-wide after a quick review.

3

Real conversations

Talk to every agent like a colleague. Redirect mid-thought. No tickets, no waiting.

4

Know what's worth it

Every session is graded for the time it saved. You see ROI per agent, per week.

type a question or click a chip above...

1 Clear handoffs

Each agent knows what it owns and who to pass the rest to.

2 Reviewed roll-outs

New skills graduate from personal → team → org on a review you control.

3 Flat-rate mode

Run agents on your Claude or ChatGPT subscription instead of pay-per-token.

WHAT COMES WITH EACH AGENT

A real teammate, not a blank prompt.

Every base agent ships with a written playbook, a clear job description, a monthly budget, and pre-set handoffs to its peers. You adjust everything during onboarding — nothing starts from scratch.

Playbook

A plain-language guide for how this agent works. You can edit it any time.

Job scope

What this agent owns, what it hands off, what it should never touch.

Budget

Set a monthly cap. Warn at 80%, pause automatically at 100%.

Schedule

Choose times for recurring work, or leave on-demand only.

Fit report for [github.com/community/finance-ops](#)

Praxio ran WAT + 4Cs against this agent. Here's what's clear, what needs work, what's missing.

WAT structure

clean

- workflow.md present
- tools/ separated from reasoning
- no inline AI calls in tools

Context (1)

good

- system prompt defined
- reads from finance_state.md
- structured P&L input expected

Connections (2)

needs mapping

- expects "ERP" → map to Xero
- expects "Email" → map to Gmail
- no credentials in repo (good)

Capabilities (3)

defined

- monthly close brief
- AR aging report
- cash-runway forecast

Cadence (4)

missing

- no schedule defined
- recommend: mon weekly + month-end
- on-demand only by default

Org fit

partial

- no existing agent in this area
- overlaps with Rosalind on "client comms"
- systems not connected: Xero

Import · finance-ops (community)

WAT ✓ 4Cs partial cadence missing

SOURCE · SKILL.MD

```
# Finance Ops
name: finance-ops
role: Finance lead
owns:
  - monthly close brief
  - AR aging report
  - cash-runway forecast
connections:
  - ERP ← needs mapping
  - Email ← needs mapping
cadence: (not defined)

# workflow.md present
# tools/ - 6 scripts
```
